Technical Support: ASI will provide help desk support 24 hours per day, 7 days per week, 365 days per year.

Supported Equipment: Customer shall report the following information to ASI on all equipment that will be covered by OHSC ("Supported Equipment") at point of OHSC purchase: chassis name, chassis serial number, full specifications, and quantity. ASI shall support the Customer's equipment as reported at the point of purchase. In the event that Customer modifies the specifications of the equipment after purchasing OHSC, the customer must provide written notice of such modifications. Equipment modifications may be subject to additional fees at Customer's expense to maintain OHSC coverage, as determined by ASI.

Onsite Support and Parts Replacement: ASI will provide next day parts replacement and onsite labor, Monday through Saturday. ASI onsite labor will install replacement parts to maintain the system and equipment in proper operating condition based on problem determination through our Technical Support. Onsite labor will only include support to Supported Equipment, as defined herein. The availability of parts onsite will be a consideration of dispatching field engineers to meet the part(s) and provide service.

All field engineers will be under the supervision of ASI during the entire process until completion of the service event. ASI will verify with the Customer the successful completion of the service event.

Following the successful completion of the service event, the Customer will be responsible for shipping the defective part or unit to ASI [189 Cobb Parkway North, Suite B7, Marietta GA 30062] with the completed [RMA form](#) that includes an ASI authorized RMA number provided by the technical support staff and a prepaid label for customers in the continental US.

Time and Materials Services: Any special written request by Customer for Services other than those specified herein shall be subject to written acceptance by ASI, special terms and conditions, and charges for time, materials, and transportation at ASI's prices in effect at the time such Service(s) or material(s) are provided. Provision of such Services shall be in the discretion of ASI and shall be subject to the availability of personnel and parts. All sales, property, excise and other federal, state and local taxes as dictated by law shall be paid by the Customer.

Site Preparation: Customer shall, at Customer's expense, prepare and maintain the hardware installation site in accordance with the manufacturer's specifications for operating environments. Customer assumes the full responsibility to back-up and/or otherwise

protect its data against loss, damage, or destruction before Services are performed. Customer also agrees to permit prompt access to hardware consistent with Customer's standard security requirements and to provide reasonable access to the facilities so as to expedite the performance of Services. Failure of Customer to comply with the conditions of this paragraph shall allow ASI to terminate any further Services to such Customer site.

Reconditioning: If, in ASI's opinion and at ASI's sole discretion, any unit of hardware must be factory reconditioned because normal repair or replacement of parts cannot keep such unit in satisfactory operating condition, ASI shall submit a quotation of the required reconditioning to Customer. In the event Customer declines to authorize such reconditioning, ASI may delete such item of hardware from the Agreement. Normal wear is expected and reconditioning at the cost of the Customer may be required in order for ASI to be able to keep hardware in good working order. It is not in the scope of ASI's Agreement requirements to maintain the Customer's equipment in "new" condition.

Additional Charges: Services performed as a result of any of the following conditions shall be subject to additional charges for labor, transportation, and parts: alterations to hardware not specified in initial system build; expendable supply items; damage resulting from improper use, in-transit damage, accident, neglect, power surge or failure, acts of nature, operating environment or the use of supplies or accessories which are not in conformance with the hardware ASI's published specifications; site surveys; maintainability inspections or any damages other than normal wear and tear.
